

## Teaching Notes

### Insects and Spiders Mural

Print out the 15 sheets which make up the mural. Each sheet has a code printed in the bottom left corner, which corresponds to those on the key below. Have your students color the sheets before cutting off the edges and taping together. Tape on the back of the sheets. To make a longer mural, you can print another set, which you can attach to the right side of the existing one. Once the mural is assembled and attached to the wall, students can place their cut out insects and spiders on the mural.

*For a longer mural, start again with the first column*
